

NetApp™
Go further, faster

Infrastructure Solutions

Top Reasons Why NetApp Is the Best Storage for VMware Environments

RESPOND TO OPPORTUNITY

To respond to changing business needs, you need to be able to deploy new virtual machines and provision storage for them quickly. With our solutions, you can slash provisioning time by 40% with no impact on servers with our nearly instant, low-overhead storage provisioning.

Shorten your test and development cycles from weeks to minutes with instantaneous cloning of your virtual machines and by instantly repurposing storage capacity between projects.

Quickly adapt to unexpected storage demands with real-time scalability and the flexibility to support any future SAN or NAS projects (FC, iSCSI, NFS, or CIFS). Shorten your test and development cycles by instantly repurposing storage capacity between projects.

MANAGE RISK

Protect your virtual infrastructure and your data with near-instantaneous backup and recovery that doesn't impact performance. With our solutions, you can recover virtual machines twice as fast as you can with either EMC or HP in VMware® environments.

Protect more of your data affordably while delivering higher levels of application availability with our network- and storage-efficient disaster recovery solutions. Speed your ability to fail over and perform frequent nondisruptive testing of disaster recovery through our integration with VMware Site Recovery Manager.

MAXIMIZE STORAGE UTILIZATION

Only NetApp enables data deduplication across your primary, backup, and archival storage, reducing your VMware storage requirements by 50% to 90%.

We help you further maximize storage utilization in several ways. Thin provisioning can increase average storage utilization above 70%, and NetApp® Snapshot™ technology reduces storage for backups. These savings will reduce your power, space, and cooling requirements by 50%.

INCREASE OPERATIONAL EFFICIENCY

You can empower your VMware administrator to manage storage for virtual machines from provisioning to data protection through policies established by the storage administrator.

Ensure recovery of your VM's critical data with application consistent, nondisruptive backups.

GET THERE FASTER

Experience a smooth transition to your optimal infrastructure with our specialized virtualization services. From assessment to implementation and management—our experienced and certified professionals, using proven methodologies and best practices, can help get you where you want to be, efficiently and with no surprises.

NetApp creates innovative storage and data management solutions that accelerate business breakthroughs and deliver outstanding cost efficiency. Discover our passion for helping companies around the world go further, faster at www.netapp.com.
